

Sustainable Transport and Travel Planning

Improve commuter and business travel and reduce your carbon footprint

Cardiff Council offers advice and support to organisations in Cardiff which are promoting sustainable travel through a Travel Plan.

A Travel Plan is a policy and action plan to:

- manage transport efficiently
- improve access by all means of travel for employees, visitors, patients and students
- encourage sustainable transport
- reduce car use.

A Travel Plan can address:

- commuting
- business travel
- fleet management
- business deliveries and transport contracts.

Travel Plans can give your organisation a competitive advantage by:

- saving money
- enhancing recruitment and retention packages
- easing relocation issues
- providing positive business image and public profile
- providing revenue through car park charging
- satisfying planning requirements for new developments/expansions.
- improving productivity from a healthier workforce
- meeting corporate goals such as carbon reduction and corporate social responsibility.

University of Wales Institute Cardiff Travel Plan

The popularity of alternative modes of travel such as walking, cycling, public transport and car sharing is continuing to grow at UWIC as a range of initiatives are being promoted to staff and students. UWIC has introduced a comprehensive Travel Plan for students, staff and visitors who travel to and from their sites and on University business.

“Our Travel Plan is a living document, which we keep alive by continuously adding new initiatives and adapting already established activities such as our bike breakfasts and new car share strategies. The Plan will never be finished but will continue to grow and be an integral part in UWIC’s development” .
